

G Gateway Sustainable Transportation Empowerment Program (STEP)

It is designed to help transporters acquire their own minibus, tricycle (Keke), and motorcycle (Okada). This scheme is designed to put smiles on the faces of our transporters by greatly reducing the cost at which they carry hire purchase by more than half, and it will also solve some of the transport-related problems.

How does it work?

- First, you fill out the application form.
- Submitted applications will be reviewed and approved by the executives of G. Gateway.
- When approved, an account will be created for you to save up to 26% of the asset you applied for.
- The 26% down payment will be spread over a period of six months on a daily or weekly basis.
- Upon completion of the item applied for, the asset will be purchased and handed over to you.

MINI BUS

Purchase	4.9M
Registration	145K
Tracker	50K
